

NIKON

Att. Technical (repair) Department

16 June 2019,

Dear repair woman/ repair man,

Hope you not needed too much tissues when reading the sad story above. You can do me a big favour (and so preventing the need of tissues here):

Really hope you can fix the D800 and hopefully for a reasonable price.

For sure its not allowed due your company policy but will suggest it anyway

The implications will be BIG here if the Nikon D800 can't be fixed. So hereby offer to donate the first recorded Dutch Skies 360° HDRI - 19k (XL) *) that is made with the repaired Nikon D800 to your department or the head quarters of Nikon (prefer the idea that it hangs on the wall of your workspace/ office).

It will be a exclusive one so no any other copies will ever be published or sold.

Now you know its very important that I can continue shooting images with the fantastic D800! Its worth the 2 days of production (thats the amount of time it takes to create a Dutch Skies 360° HDRI - 19k (XL)).

Please note: not implicating getting the repair for free with giving the exclusive Dutch Skies 360° HDRI - 19k (XL)!

If you can fix the camera, so actually will have a revised quality checked camera again, then can continue using the camera and meanwhile reserve some money in the upcoming years for buying the D8XX in the future. That would be the ideal situation in this case.

You know me to find if you need more information.

Greetings, thanks & good luck with the repairing!

Bob Groothuis
